## PREFACE

The Pesticides Control Board is a statutory organization of the Malawi Government established under the Pesticides Act, Cap 35.3, Laws of Malawi.

The Board regulates the importation, exportation, manufacture, distribution and use of pesticides. Since establishment, in 2000 the Board has registered many pesticides, which are available to the public for use in public health, livestock, agriculture and the construction industry.

This register is meant to avail to the public, farmers, extension staff, pesticide stockists, exporters, manufacturers, government institutions and other stakeholder's pesticides which have been evaluated by the Board for safety, efficacy, quality and economic value. However, it is important to note that the science of pesticides is quite dynamic such that more new/safer pesticide active ingredients and formulations are being developed and evaluated on a continuous basis. Pesticide manufacturers also change product names and formulations based on market demands and economics of production. The list is reviewed from time to time to accommodate such changes and therefore, it is advisable to have and use the most up to date version.

It is also important to note that some pesticides have been withdrawn or banned because of new scientific discoveries related to their safety to human, animal and/or the environment.

A pesticide is registered for a period of five years, but at the expiry of this period, the pesticide registration can be renewed for another five years' period at any one time. Please note that it is an offence under the Pesticides Act to import or sell in Malawi any pesticides unless it has been registered by the Board.

The board within its mandate as prescribed by the Pesticides Act, Section 3 undertakes evaluation of pesticides in the country for safety, efficacy and quality before registration. In addition, it regulates trade of pesticides through inspection, licensing and product certification. A wide range of pesticides for use in agriculture, animal health, forestry, public health, construction industry and their registered uses have been covered. Any other uses outside the registered uses are not authorized until such a product has been considered for label extension. Therefore, the use of pesticides in a manner that is inconsistent with the directions on approved labels is prohibited.

The Technical Committee Members, that evaluate dossiers and recommend products for registration, meet on a quarterly basis. A prescribed non-refundable processing fee of US\$550 plus a refundable fee of K150, 000 must be paid at a time of submission of the dossier. It takes a maximum of 4 months to register a product in Malawi

The document comprises of:

## ACKNOWLEDGEMENTS

The Board recognizes and does not take for granted the involvement and contributions of various stakeholders in producing this list. We wish to acknowledge and thank the Government of the Republic of Malawi through the Ministry of Agriculture, Irrigation and Water Development for support and providing an enabling environment. We also wish to thank all institutions and researchers who have conducted local efficacy trials and provided the required information, through the Agricultural Technology Clearing Committee, which has been used in the compilation of this document and for their continued cooperation in the furtherance of safe use of pesticides in Malawi.

We are grateful to the PCB Board members for providing guidance and facilitating us in undertaking the roles of the board. Our appreciation is to the entire staff who participated fully in the compilation and editing of this document. Special thanks go to the Technical Committee members who tirelessly engaged in the evaluation of the dossiers for recommendation to the board for approval of registration.

Finally, PCB wishes to thank all the stakeholders in the Pesticides Industry and all those who have made valuable contributions towards the publication of this document.

Registrar,  
Pesticides Control Board
